Knitting Doll Instruction

- 1) Run the end of the yarn down through the centre hole. Leave approximately 10 cm of yarn at the bottom of the doll as a tail. The working end of the yarn is at the top of the doll.
- 2) Wind yarn as Pic 1, 2, 3 and 4.

- 3) Hold the doll in left hand with the first peg (A) in front of you. Keep the working yarn in front of first peg (A).
- 4) Pick up the bottom looped stitch with your needle as Pic 5.

- 6) Slip the looped stitch over and passed working yarn and drop the stitch over the peg as Pic 6.
- 7) Turn doll anti clockwise to the next peg (C) and continue with the same action Pic 5 and 6 with next peg (C).

Keep on knitting like this and as you knit, pull carefully on the tail to keep the stitches tight and even. The knitted piece will come through the hole in the bottom of the doll. To finish off, lift the yarn carefully from the doll and pass the end of the yarn through each of the last four loops and pull tight.
